PROJECTS

1. Clone Website

Developed Website for my web development assignment using HTML and CSS

<https://github.com/RohanCodes808/clone-website>

2. Weather Application

Developed a weather application using HTML, CSS, and JavaScript, which provides real-time weather data sourced from openweathermap.org.

<https://github.com/RohanCodes808/weather-application>

3. Portfolio Design

I designed a portfolio website for a friend of mine using figma and photoshop.

<https://www.behance.net/gallery/174182957/Portfolio-Design>

4. Random Password Generator

Developed a random password generator using HTML, CSS, and JavaScript, capable of generating 14-character random passwords that can be conveniently copied through the input text field.
